

►►►► ONE CALIBRATOR ONLY ►►

The MEMOCAL 2000 is a lightweight versatile, portable, hand-held calibrator developed to solve two different and coexisting customer needs: field calibration (maintenance) and laboratory calibration (maintenance, quality control, process simulation, training, etc...).

- The field calibration requires small dimensions, no additional accessories, long battery life, ergonomics, friendly interface, low temperature drift, high noise immunity and simple programming capabilities.

The laboratory calibration requires: digital interface to data loggers or supervision and control systems, large range of I/O capabilities, high accuracy and stability over time.

MAIN FEATURES:

- Double linearization standards for thermocouples and RTD.
- Accuracy: 0.015% (*) .
- Temperature drift 0.1 μ V/ $^{\circ}$ C.
- Operates with standard AA type alkaline batteries or rechargeable batteries (Ni-Cd or Ni-Mh).
- Advanced battery power management for circuit stand-by mode or when voltage step-up is not required.
- 24 hours (average) battery life operation (**).
- Built-in bi-directional RS-232 interface for remote programming and data recording by personal computer (***) .
- Calibrator cradle, recharger and RS-232C / RS-485 converter in a companion desk-top module.
- Like the forerunner, the Memocal 81, it is encased in a genuine leather protective case.
- Autoranging during measurement and generation.
- Simulates and measures T/C signals (15 T/C type) and RTD signals (Pt 100 and Ni 100).
- Generates and measures mA, mV, V and OHM signals.
- Square root extraction and quadratic signal generation.
- Programmable scaling for mA, mV and V measurement and generation.
- Built-in 24 V DC power supply for 2-wires transmitter excitation and measurement.
- Programmable external cold junction compensation value.
- Peak and valley data hold.
- Direct connection for all input types (no special connectors are required for TC inputs).
- Up to 50 program steps to create one or more programs.
- Ramp, soak and step function capabilities.
- 2 dry contact logic inputs for program advance/wait.
- 2 rows by 16 characters alphanumeric LCD display.
- Timed back lighted display.
- Ergonomic front panel with:
 - numerical multi function tactile keyboard
 - menu driven display with parameters-naming capability.

(*) Reference accuracy (see table)

(**) With Ni-MH batteries

(***) For software requirement contact ERO Electronic.

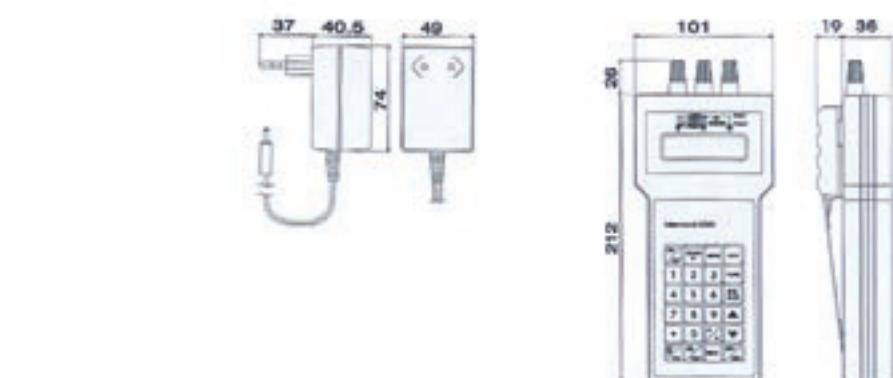

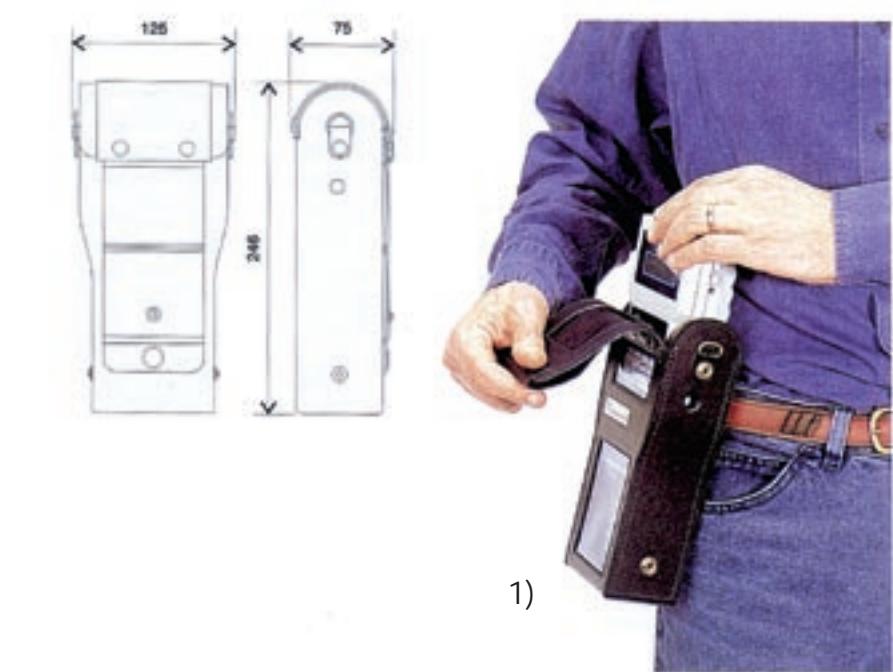

MEMOCAL 2000

GENERAL SPECIFICATIONS

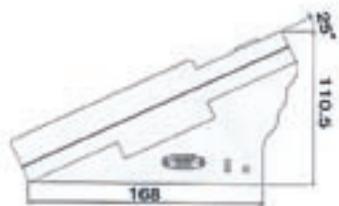

Case: ABS, colour similar to RAL 6038.
Self extinguishing degree: V-0 according to UL.
Input protection: all measured and generated range are protected against fault connection to signals up to 30 V AC/DC.
Terminals: 3 external screw FEMALE plugs Ø 4 mm.
Weight: 600 g max. (1,4 lb).
Power supply:
4 batteries AA size:
- Alkaline 1,5 V or
- Ni-Cd 1,2 V or
- Ni-MH 1,2 V.
- Switching type AC adapter (100 to 240 V AC).

Battery life: 24 hours (average) with Ni-MH batteries.
Recharging time: 12 hours.
Insulation resistance: > 100 MΩ according to IEC 348.
Isolation voltage: 1500 V r.m.s. according to IEC 348.
Common mode rejection ratio: 120 dB @ 50/60 Hz.
Normal mode rejection ratio: 60 dB @ 50/60 Hz.
Electromagnetic compatibility:
This instrument is marked **CE**.
Therefore, it is conforming to council directive 89/336/EEC (reference harmonized standard EN-50081-2 and EN-50082-2).

A/D conversion: dual slope integration.
Sampling time: 500 ms.
Display update time: 500 ms.
Temperature drift: 0.0028%/°C or 28 ppm/°C.
Operating temperature: from 0 to +40 °C.
Storage temperature: from -10 to +60 °C.
Humidity: from 20% to 85% RH non condensing.

► FOR FIELD AND LABORATORY USE:

*Desk-top stand
with RS-232 / RS-485 converter
(isolated) and battery quick recharge
capability.*

Leather bag

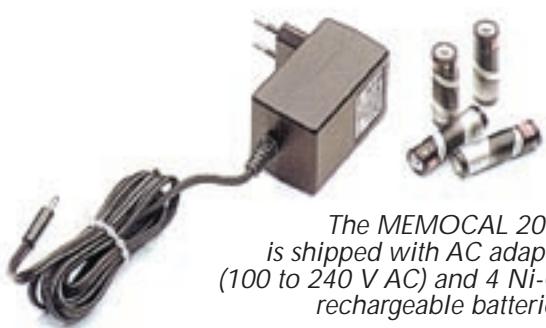

This accessory has been designed to assure a mechanical protection to the instrument but also to simplify the operativity in non comfortable conditions.

For this reason, in addition to the standard use, it performs 3 additional functions:

- 1) waistband support with snap clutch,*
- 2) long-strap bag with "hand free operation" capability,*
- 3) desk-top stand.*

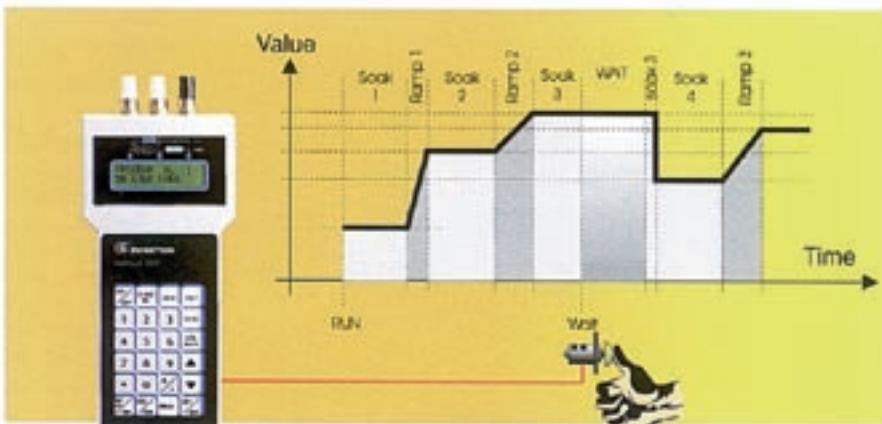

Standard equipment

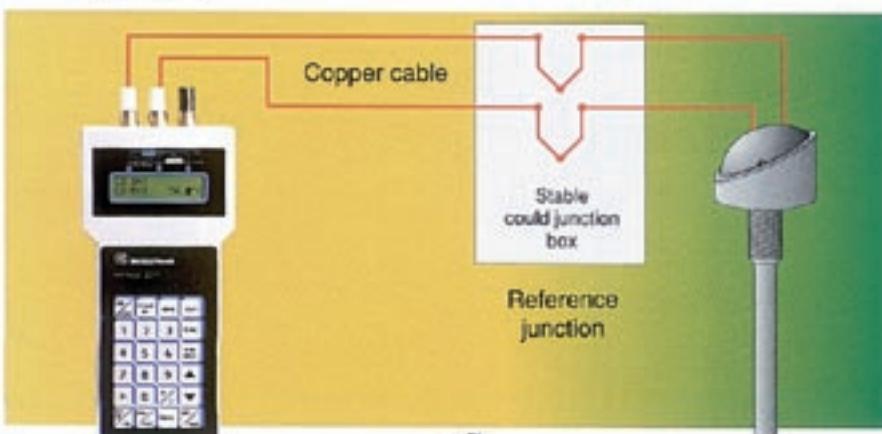

The MEMOCAL 2000 is shipped with AC adapter (100 to 240 V AC) and 4 Ni-Ca rechargeable batteries.

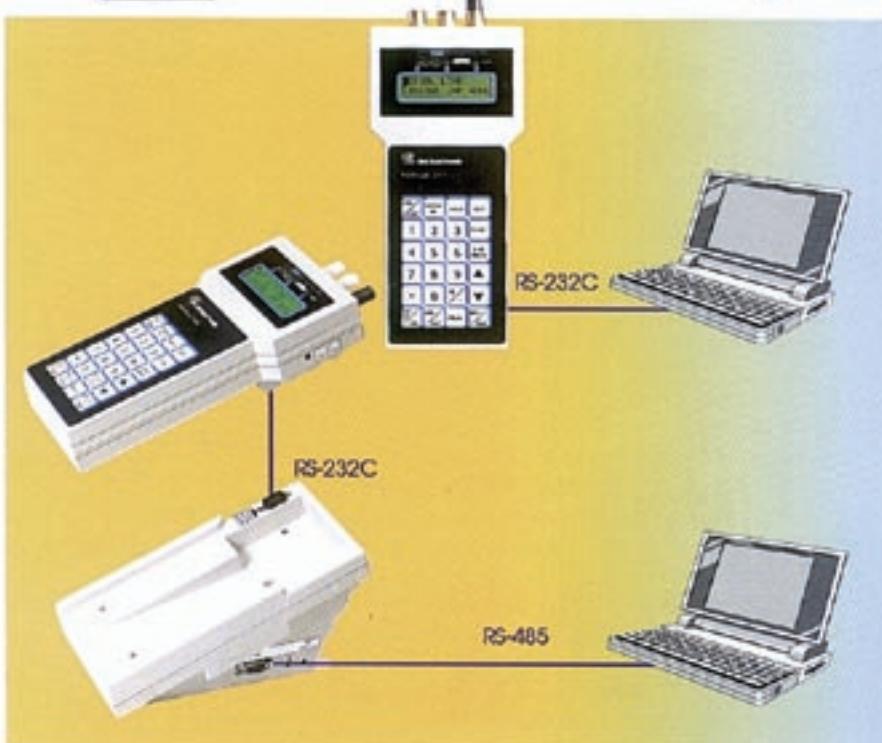

FRIENDLY, ACCURATE AND COMPACT

- Up to 50 steps program or smaller programs in 50 steps.
- Ramp or step and soak function capabilities.
- 2 dry contact logic inputs for program advance/wait.

- Programmable external cold junction compensation value.

2 SERIAL INTERFACES

Built-in RS-232 or
external RS-485.

3 TYPES OF BATTERY
SOLUTIONS
(AA size)

MEMOCAL 2000

MEASURING INPUTS

mA and V inputs

Ranges: see table below.
Resolution: see table below.
Reference accuracy:
see table below.
Range selection:
automatic or manual.
Input impedance:
 $10\ \Omega$ for mA input
 $> 10\ M\Omega$ for mV inputs
 $> 500\ k\Omega$ for 20 V input.
Square root extraction:
programmable.
Read-out: keyboard programmable
from -20000 to 20000.
Decimal point: programmable in
any position.

STANDARD RANGES TABLE

Range	Resol.	Ref. Accur. (\pm)
-20 mV to 20 mV	1 μ V	0.015%
-200 mV to 200 mV	10 μ V	0.015%
-2 V to 2 V	100 μ V	0.015%
-20 V to 20 V	1 mV	0.020%
-20 mA to 20 mA	1 μ A	0.015%
-130 mA to 130 mA	10 μ A	0.020%

TX MEASUREMENT

The TX measurement is a mA measurement with a 24 V power supply generated by the instrument and is used to calibrate 2, 3 or 4-wire transmitters.

Power supply: 24 V DC
(maximum current 24 mA).

Resolution: 1 μ A.

Reference accuracy: 0.015%.

Input impedance: $10\ \Omega$ for mA input.

Input range: 0 to 20 mA.

Square root extraction:
programmable.

Read-out:
keyboard programmable from
-20000 to 20000.

Decimal point: programmable in
any position.

Burn out: the instrument shows
the "OPEN" message when a
burn out condition is detected.

RTD input

RTD type:
- Pt 100 3-wire connection.
- Ni 100 3-wire connection.
Calibration: programmable
according to IPTS-68 or ITS-90.
Line resistance: up to $20\ \Omega$ /wire
with no measurable error.
Engineering unit:
 $^{\circ}$ C or $^{\circ}$ F keyboard programmable.
Measuring current: 100 μ A.
Burn out: detection of the sensor
open circuit and one or more wires
open circuit.

STANDARD RANGE TABLE FOR RTD Pt 100

Range (Pt 100)	Resol.	Ref. Accur. (\pm)
-200 $^{\circ}$ C to 850 $^{\circ}$ C	0.1 $^{\circ}$ C	0.028%
-328 $^{\circ}$ F to 512 $^{\circ}$ F 513 $^{\circ}$ F to 1562 $^{\circ}$ F	0.1 $^{\circ}$ F < 0.2 $^{\circ}$ F	0.012% 0.029%

STANDARD RANGE TABLE FOR RTD Ni 100

Range (Ni 100)	Resol.	Ref. Accur. (\pm)
-60 $^{\circ}$ C to 350 $^{\circ}$ C	0.1 $^{\circ}$ C	0.029%
-76 $^{\circ}$ F to 662 $^{\circ}$ F	0.1 $^{\circ}$ F	0.029%

Ω input

STANDARD RANGE TABLE

Range	Resolution	Ref. Accuracy (\pm)
0 to 800 Ω	0.1 Ω	0.025%

Thermocouples

Type: B, E, J, K, L, N, Ni/Ni-18% Mo,
PLII, R, S, T, U, W, W3 and W5
Keyboard programmable.
Engineering unit:
 $^{\circ}$ C or $^{\circ}$ F keyboard programmable.
Burn out: detection of the open
input circuit (wires or sensor) with
"OPEN" indication.
Cold junction:
automatic compensation.
Cold junction compensation error:
 $\pm 0.3\ ^{\circ}$ C $\pm 0.005\ ^{\circ}$ C/ $^{\circ}$ C.
External cold junction
compensation: programmable
value from -20 to 80 $^{\circ}$ C.
Input impedance: $> 10\ M\Omega$.
Calibration: programmable
according to IPTS-68 or ITS-90.

NOTES

New "International Temperature Scale" (ITS-90)
In September '89, the "International Committee of Weights and
Measures" defined the new "International Temperature Scale" (ITS-90)
that replaces the "International Practical Temperature Scale" (IPTS-68).
Compared to the previous scale, the new one is more extensive, more
reproducible and more accurate.
The various reference organisations are developing tables relative to
thermocouples and RTD according to the new standard.
Therefore, at the present time, there are no actual references for ITS-90
but only INFORMATIVE NOTES issued by the various organisations
which, in a preliminary phase, includes the tables relative to some
thermocouples and RTD.
Thanks to these informative notes, it was possible to implement the
linearization of almost all the most common thermocouples and RTD.

STANDARD RANGES TABLE

TC type	RANGE in °C	Resolution	Ref. Accuracy (\pm)
J	-200°C to 1200°C	0,1 °C	0,021%
K	-200°C to 967°C 968°C to 1370°C	0,1 °C $< 0,2$ °C	0,018% 0,032%
T	-200°C to 0°C 1°C to 400°C	0,1 °C 0,1 °C	0,045% 0,023%
E	-200°C to 1000°C	0,1 °C	0,019%
R	-50°C to 0°C 1°C to 350°C 351°C to 1684°C 1685°C to 1760°C	< 0,3 °C $< 0,2$ °C 0,1 °C $< 0,2$ °C	0,08% 0,048% 0,024% 0,037%

MEMOCAL 2000

GENERATIONS

mA and V generation

Ranges: see table below.

Resolution: see table below.

Accuracy: see table below.

Output impedance:

50Ω for mV output

0.5Ω for the other V outputs.

Maximum load for mA output:

500Ω .

Range selection:

automatic or manual.

Quadratic signal generation: programmable.

Read-out: keyboard programmable from -4000 to 20000.

Decimal point: programmable in any position.

STANDARD RANGE TABLE

RANGES	Resol.	Ref. Accur. (\pm)
-4 mV to 20 mV	1 μ V	0.015%
-40 mV to 200 mV	10 μ V	0.015%
-400 mV to 2000 mV	100 μ V	0.015%
-4 V to 20 V	1 mV	0.020%
0 mA to 21 mA	1 μ A	0.015%

RTD simulation

RTD type:

- Pt 100 3 wire connection.

- Ni 100 3 wire connection

Calibration: programmable according to IPTS-68 or ITS-90.

Engineering unit:

$^{\circ}$ C or $^{\circ}$ F keyboard programmable

STANDARD RANGE TABLE FOR RTD Pt 100

Ranges (Pt 100)	Resol.	Ref. Accur. (\pm)
-200 $^{\circ}$ C to 850 $^{\circ}$ C	0.1 $^{\circ}$ C	0.029%
-328 $^{\circ}$ F to 512 $^{\circ}$ F 513 $^{\circ}$ F to 1562 $^{\circ}$ F	0.1 $^{\circ}$ F < 0.2 $^{\circ}$ F	0.022% 0.025%

STANDARD RANGE TABLE FOR RTD Ni 100

Ranges (Ni 100)	Resol.	Ref. Accur. (\pm)
-60 $^{\circ}$ C to 350 $^{\circ}$ C	0.1 $^{\circ}$ C	0.036%
-76 $^{\circ}$ F to 680 $^{\circ}$ F	0.1 $^{\circ}$ F	0.036%

Ω simulation

STANDARD RANGE TABLE

Range	Resolution	Ref. Accuracy (\pm)
15 to 500	0.1 Ω	0.031%

Thermocouples

Type: B, E, J, K, L, N, Ni/Ni-18%Mo, PLII, R, S, T, U, W, W3 and W5 keyboard programmable.

Engineering unit:

$^{\circ}$ C and $^{\circ}$ F keyboard programmable.

Output impedance: 50Ω .

Calibration: see table.

Standard ranges: for ranges, accuracies and resolutions see thermocouples standard ranges table.

SPECIAL FEATURES

Backlight: LED backlighting with manual ON and automatic (30 seconds) shut OFF.

Self diagnostic:

at instrument start up.

Peak detection: minimum and maximum Peak Picker.

SEQUENTIAL FUNCTION ROUTINE

This instrument is provided of 50 steps which can be utilized to make up one or more programs. Each program can encompass a free number of soke and ramp simulations, measurements and stand by steps.

Low battery test

A test is provided at 3 different levels:

- 1) Level 1: the instrument is fully operative.
- 2) Level 2: the instrument shows the message "BATTERY LOW" on the upper display while the lower display shows the measured or generated value.
The instrument is still fully operative.
- 3) Level 3: the instrument turns OFF automatically and utilizes the remaining power for memory back up only.

SERIAL INTERFACE (optional)

Types:

- Built-in: RS-232C.

- External: RS-232 to RS 485 optoisolated converter installed in the desk-top stand.

Protocol type: MODBUS, JBUS.

Baud rate: keyboard programmable from 600 to 19200 BAUD.

Byte format: 8 bit.

Parity: even, odd or none programmable.

Stop bit: one.

Address: from 1 to 255.

Output voltage levels: according to EIA standard.

LOGIC INPUTS

The MEMOCAL 2000 is equipped with 2 logic inputs.

They are mutually exclusive with serial interface.

These 2 logic inputs have the following functions:

- 1) Logic input 1: sequences to the next program step.
- 2) Logic input 2: it allows to start or to suspend the program execution (RUN/WAIT).
